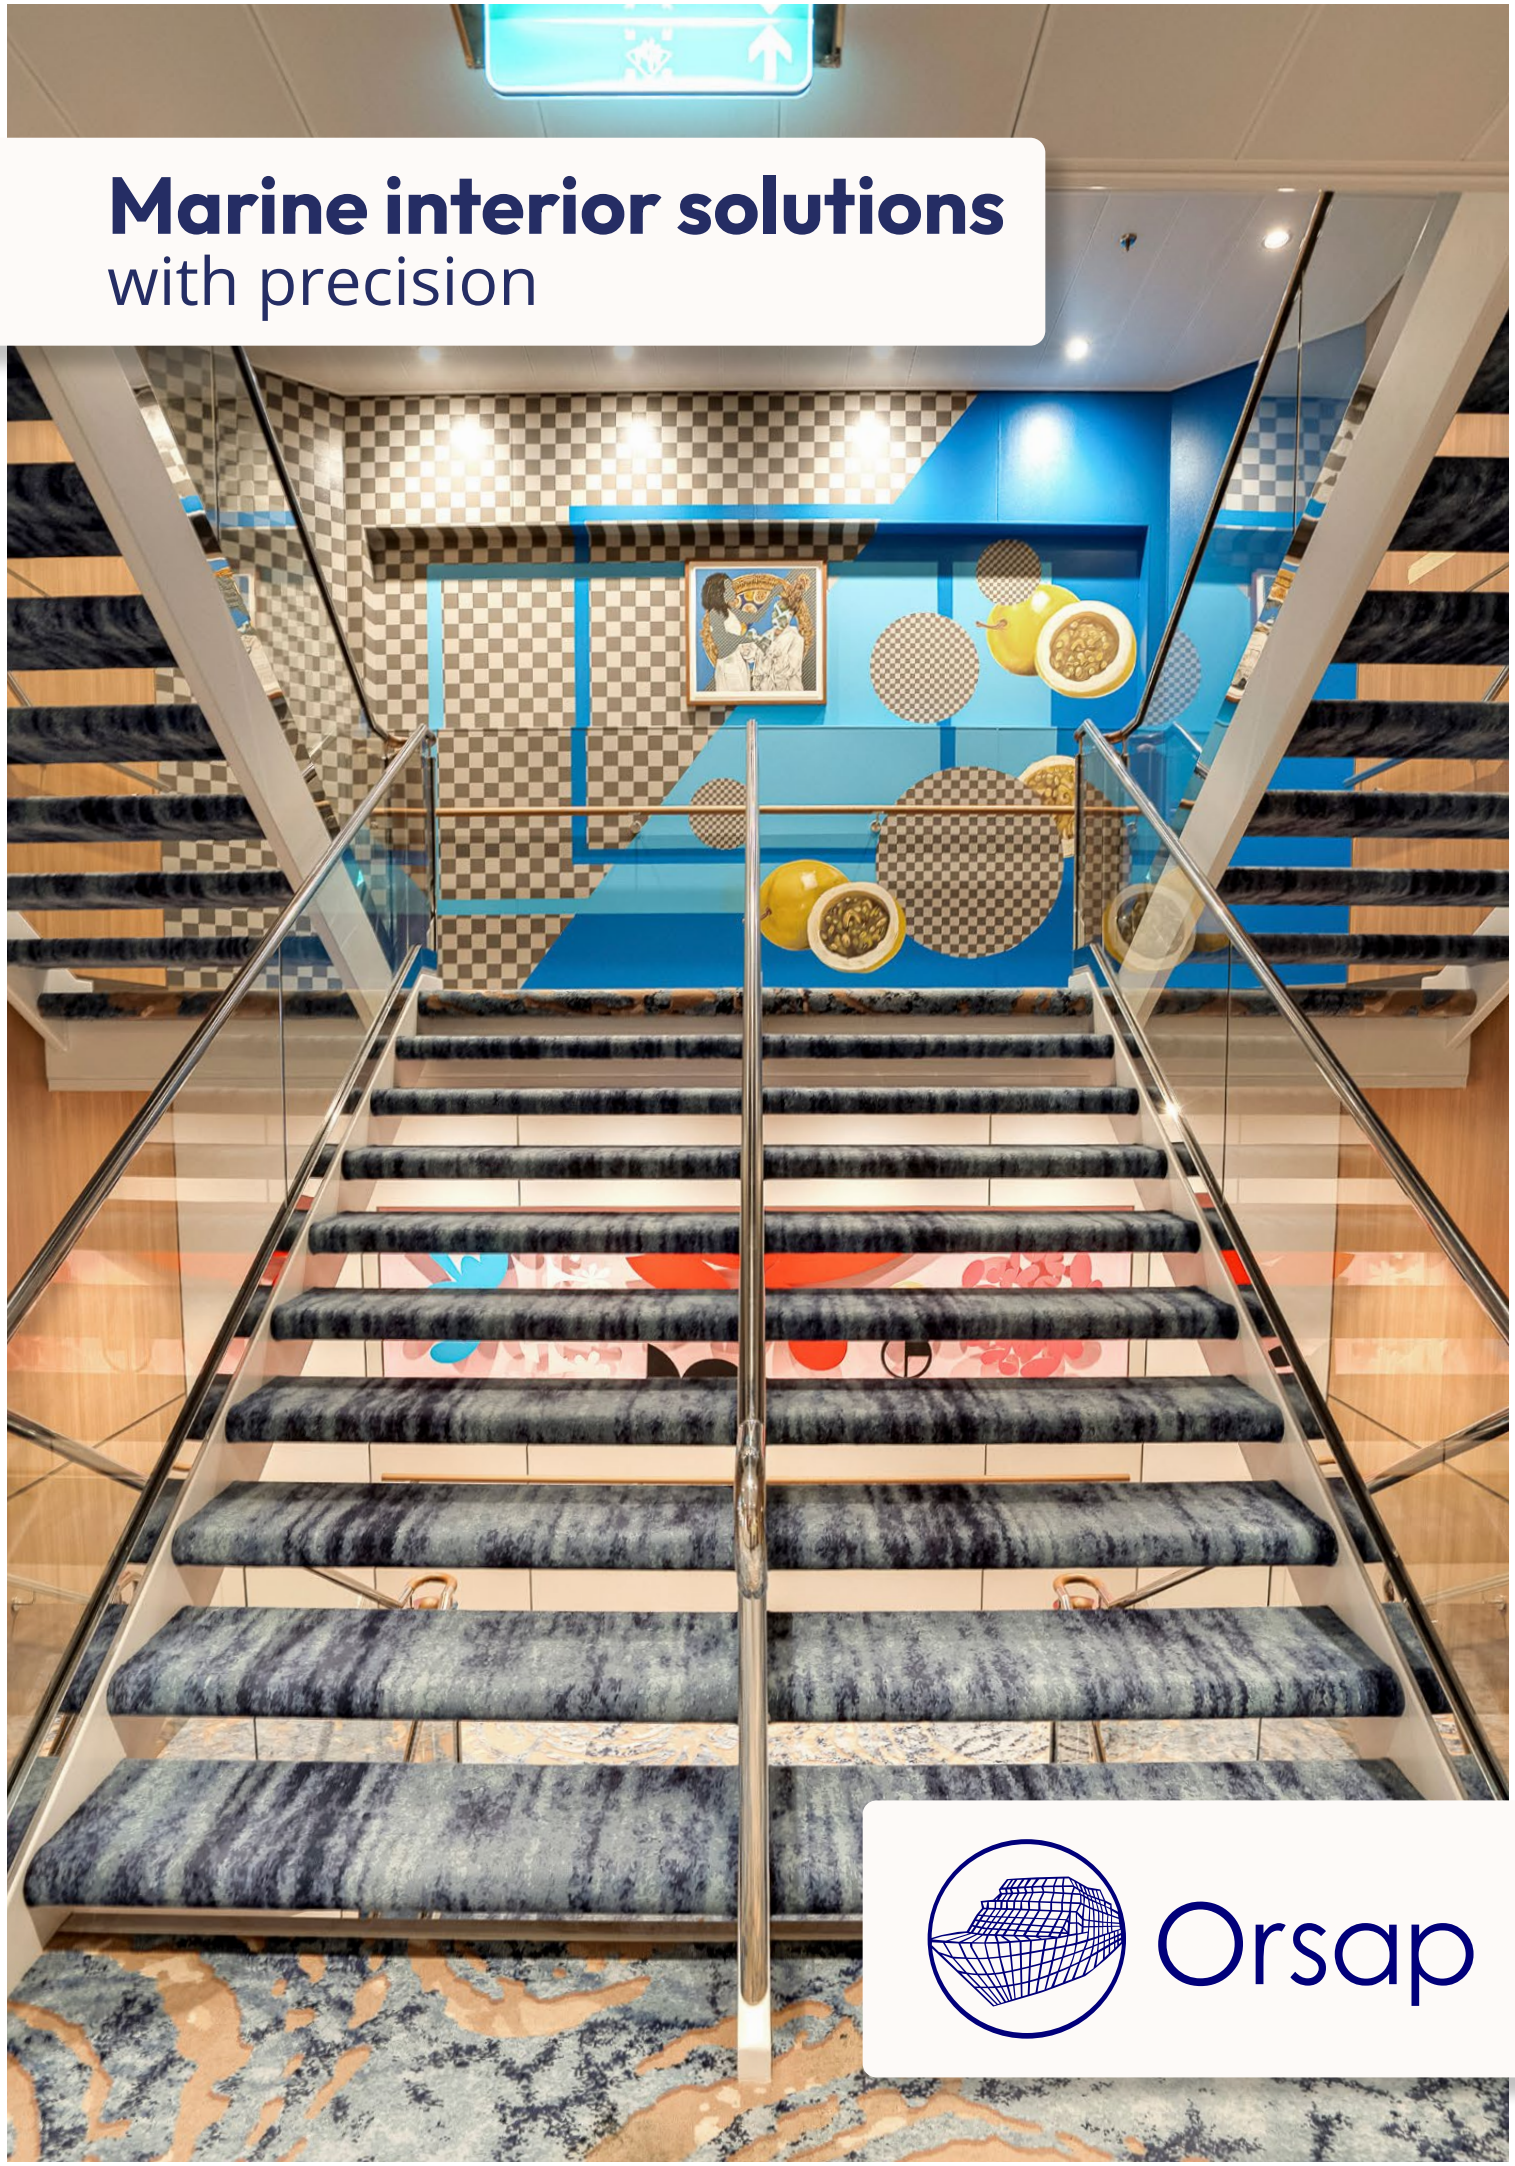
Marine interior solutions
with precision



Orsap

SINCE 1991

100+ CRUISE SHIP PROJECTS

International marine expertise

Legacy through mastery and skill.

Established in Raisio in 1991, Orsap delivers demanding marine interior projects for cruise and passenger ships. Our in-house specialists bring together 3D design, project management, procurement, logistics, warehousing and production. Installation is completed under Orsap supervision with trusted specialist partners.

International marine projects

We work at major European shipyards and on vessels sailing worldwide. Our role often begins at concept and basic design and continues throughout projects that can span around three years.

Trusted long-term partner

Continuity is our strength. Knowledge stays close, decisions move quickly and close cooperation with shipowners and shipyards keeps the whole project on course.

NICO LEPPÄNEN
CEO

"Orsap's strength is our ability to manage demanding projects with our own organisation. In-house 3D design, project management, logistics, warehousing and site teams keep knowledge and responsibility with the project from early design through delivery and warranty. Experience from international steel-to-steel deliveries gives us a deep understanding of the whole shipbuilding process. By joining early and staying involved for several years, we can anticipate challenges and align our work with the shipyard's wider project. Success is built together by the shipowner, shipyard, Orsap and our long-term partners. Above all, it is built by people, experience and silent know-how."

TO A PIONEER IN
INDUSTRIAL PIPING

SIMO KÄRKKÄINEN
Design Manager

”More than a decade of developing our comprehensive 3D design has made it the foundation of every project. A successful model must work in production and on site, with materials, interfaces, logistics and installation considered early. Because design, project management, logistics, warehousing and production operate within the same organisation, feedback moves continuously in both directions. Lessons learned on site and in previous projects can be applied while new solutions are still being developed. Close collaboration with our project teams, shipowners, shipyards and long-term partners helps us identify the impact of changes early and allows every new project to start from a stronger position.”

Turnkey solutions

More than turnkey. Expertise that stays in-house.

Our strength is not a set of separate services. It is the way our own people, knowledge and systems work together from first concept to final installation.

Engineering & planning

3D is at the heart of every project. Our in-house design team brings interiors, HVAC and hull structures into one shared model, resolving interfaces early and turning complex ideas into precise, buildable solutions.

Procurement & supply chain

Our own procurement, logistics and warehousing connect materials with the project plan. ERP-supported processes keep information visible and help secure the right materials at the right time.

Prefabrication & installation

Fully outfitted interior elements are prepared in controlled conditions. On board, Orsap supervisors and trusted specialist partners complete the work with quality, safety and certainty.

3D DESIGN AT THE HEART OF EVERYTHING.

From plan to completion

One continuous view across the full project lifecycle.

Project management

Core project knowledge stays in-house. Our project teams carry information across design, procurement, logistics, production, installation and final inspection. Internal monitoring and ERP-supported processes keep the whole project visible from one phase to the next.

Quality & challenging schedules

Demanding schedules leave no room for uncertainty. We solve interfaces early, maintain schedule discipline and inspect before delivery. This protects quality even when changes are inevitable.

Project lifecycle

A major marine project can span more than three years. Orsap joins early and stays involved through close collaboration with the shipowner and shipyard, supported by a trusted long-term partner network. This shared understanding keeps the project on course from concept and basic design through production, delivery and warranty.

RIGHT THINGS. RIGHT TIME. ALL TOGETHER.

Monipuolinen metallipaja Turussa

Meiltä saat koko valmistusprosessin suunnittelusta pintakäsittelyyn - toimimme myös sopimusvalmistajana ja tarjoamme metallin alihankintaa. Valmistamme tuotteita yksittäiskappaleista sarjatuotantoon.

metalprocess.fi

Me olemme monipuolinen turkulainen metallipaja, ja meiltä saat koko valmistusprosessin suunnittelusta pintakäsittelyyn. Eikä meillä käsitellä pelkästään levytavaraa, vaan myös esimerkiksi putkia. Meillä ohutlevytuotteet ja teräsrakenteet suunnitellaan ja valmistetaan aina asiakkaan tarpeen mukaan. Jos haluatte apua tuotteen suunnittelussa, opastamme ja autamme mielellämme jo heti projektin suunnitteluvaiheessa. Toimimme myös **ohutlevytuotteiden sopimusvalmistajana** ja tarjoamme **metallin alihankintaa**.

Ohutlevytyö
Hoidamme ohutlevytyönne aina leikkeistä valmiiseen tuotteeseen asti – myös sopimuspohjaisesti.

Laserleikkaus
Tarjoamme metallin laserleikkausta tarpeidenne mukaan.

Maalaus- ja pintakäsittely
Meiltä ohutlevytöiden lisäksi teollisuusmaalaus ja pintakäsittely.

Suunnittelu
Olittepa jo pitkällä suunnittelussa tai vasta alkumetreillä, autamme mielellämme.

Pieni laiva kääntyy nopeasti, sanotaan, ja se pitää meillä paikkansa. Tilauksesta tuotantoon on meillä hyvin lyhyt matka.

Maalaus ja pintakäsittely

Meiltä saat koko maalausprosessin suunnittelusta pintakäsittelyyn. Toimimme sopimusmaalajana ja tarjoamme metallin maalauksen alihankintaa.

metalpainttingss.fi

Tarjoamme teollisuuden tarpeisiin sekä **pulveri-** että **märkämaalausta**, ja asiakkainamme ovat erityisesti laiva- ja metalliteollisuuden toimijat. Pulverimaalaus tuottaa kestävän, tasaisen ja kulutusta kestävän pinnan niin sarjoihin kuin yksittäiskappaleisiin. Märkämaalaus puolestaan soveltuu erinomaisesti suurille, lämmölle aroille tai erityisiä maalijärjestelmiä vaativille metallikappaleille. Toteutamme työt ammattitaidolla Turusta koko Suomeen ja tarvittaessa myös ulkomaille.

Pulverimaalaus

Tasainen, kulutusta kestävä pinta sarjoihin ja yksittäiskappaleisiin. Toteutamme pulverimaalauksen Turusta koko Suomeen ja tarvittaessa ulkomaille.

Pulverimaalausuunin sisämitat:
Pituus: 3400 mm
Leveys: 1100 mm
Korkeus: 2000 mm

Maksimikoko maalattaville kappaleille uunin sisämittojen mukaan.

Märkämaalaus

Märkämaalaukset ruiskutamme maalauskammiossamme, jossa voimme käyttää sekä nykyisiä vesiohenteisia maaleja että perinteisiä liuotinpohjaisia maaleja. Näin pystymme valitsemaan oikean maalityypin kohteen, käyttötarkoituksen ja vaaditun maalijärjestelmän mukaan.

Marine interiors

Exceptional experiences on board.

We deliver interiors that shape the passenger journey and technical solutions engineered for demanding marine environments.

Public areas

Main staircases, lift lobbies, spa and treatment areas, restaurants, galleys, conference spaces and public restrooms. We master complex interfaces, visible finishes and large scopes with the same precision.

Cabins & luxury suites

Passenger cabins, crew cabins, deluxe accommodation and high-end suites. Accurate engineering and refined execution bring comfort, function and detail together.

Technical installations & modules

Prefabricated office and bathroom modules, HVAC, piping and AC-room installations. Our technical expertise connects interiors, systems and structures into solutions ready for life at sea.

FROM VISIBLE LUXURY TO HIDDEN TECHNICAL PRECISION.

Prefabrication & production

Designed in 3D. Built in modules. Installed with certainty.

Production capabilities

Our production and warehouse facilities connect digital planning directly with prefabrication. Issues are resolved close to the work, materials remain under control and knowledge moves quickly between the office, warehouse and workshop.

Modular prefabrication

Fully outfitted interior elements are built in controlled conditions before they reach the ship. This supports repeatable quality, reduces onboard work and creates an efficient route to installation.

Partner network

Our network is built on continuity. Many of our material suppliers and specialist partners have worked with Orsap for decades. Shared values, mutual understanding and accumulated know-how turn long-term relationships into reliable results and help every project start from a stronger position.

TOGETHER, WE STEP FURTHER.

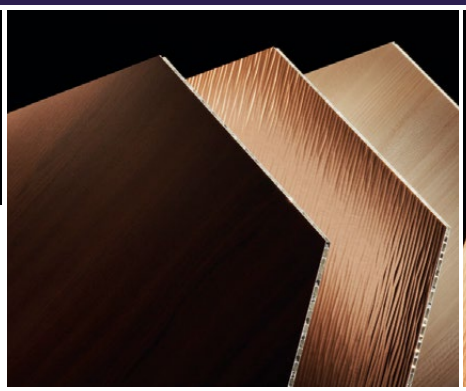
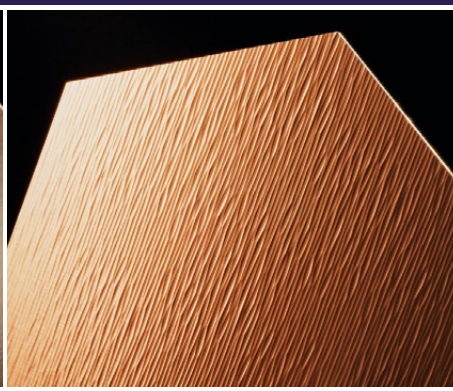
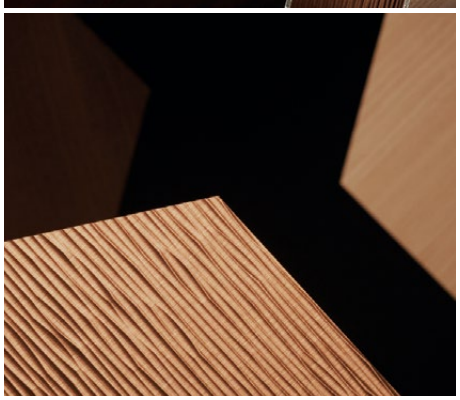
POTMA
THE LIGHTWEIGHT CHAMPION

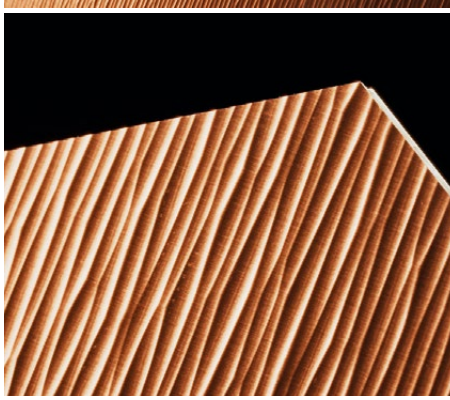
Where strength and lightness matter

Potma is a developer and a manufacturer of honeycomb structures.









Pioneer in the development of honeycomb structures

We are the masters of combining the best of both worlds, where strength and lightness matter. Our innovative products are durable yet lightweight.

Applications

- Cruise ship structures
- Lift industry
- Construction industry
- Furnishment of rolling stock
